Provide 5 photos, please
I can provide my own visa/work permit for Germany within 5-8 weeks. My notice period is XX days.

TECHNICAL SKILLS

Data Analyst (4+ years of project experience) | **Data Analytics & Programming:** SQL | Python | Pandas | NumPy | Statistical Analysis | Data Analysis | Exploratory Data Analysis | Forecasting | KPI Analysis; **Business Intelligence & Visualization:** Power BI | DAX | Excel (Advanced) | Data Visualization | Dashboard Development; **Data Engineering & Modeling:** ETL | SAP BODS | SAP ECC | Data Migration | Data Modeling | Star Schema | Dimensional Modeling | Data Validation | Data Quality | Synthetic Data Generation | JSON; **AI & Analytics:** Claude API | AI-assisted Natural-Language Insights | LLM Fundamentals | Prompt Engineering; **Business & Supply Chain Analytics:** Supply Chain Analytics | Inventory Analysis | Procurement Analytics | Revenue Analysis | Margin Analysis | Demand Analysis | KPI Reporting; **Web & Integration:** REST APIs | React | Node.js | Tailwind CSS; **Tools & Delivery:** Git | GitHub | Vercel | SDLC

WORK EXPERIENCE

01/2026 – today

Data Analyst
Balaji Pharma, Indore, India
Project: bUlleTin – Revenue Intelligence & Analytics Platform - delivers real-time visibility into revenue performance, business trends, forecasts, and AI-assisted insights to accelerate data-driven decision-making.

- Design an end-to-end SQL → Python → JSON → web analytics workflow to track revenue performance, trends, and management KPIs.
- Build reusable Python analytics with Pandas, NumPy, statistical analysis, and forecasting to convert transactional data into decision-ready insights.
- Develop a Claude API-powered conversational analytics layer, enabling natural-language exploration of business data beyond static dashboards.
- Integrate analytics into a React/Node.js dashboard via JSON and REST APIs, deploy on Vercel, and automate manual analysis and insight generation.

Technologies used: SQL | Python | Pandas | NumPy | Statistical Analysis | Forecasting | JSON | Claude API | React | Node.js | REST APIs | Tailwind CSS | Vercel

MM/YYYY – MM/YYYY

Project: Supply Chain & Revenue Analytics - delivers actionable visibility into revenue, margins, inventory, seasonality, distributor performance, and SKU-level supply-chain risks for an Ayurvedic pharmaceutical SME.

- Designed a 14-table star schema with 7 dimension and 7 fact tables across sales, procurement, production, inventory, distributors, and finance, applying validation rules for data integrity, inventory logic, growth, and seasonality.
- Developed Power BI dashboards and DAX KPIs for revenue growth, gross margin, inventory turnover, distributor performance, seasonal

demand, and SKU-level risk, translating insights into procurement, pricing, and inventory recommendations.
- Applied data-quality checks to separate business patterns from synthetic-data artifacts and documented the complete solution in GitHub, including data model, dashboard assets, data dictionary, findings, quality report, and known limitations.

Technologies used: SQL | Power BI | DAX | Excel | Data Modeling | Star Schema | Dimensional Modeling | ETL | Data Analysis | Data Quality Validation | Synthetic Data Generation | GitHub

08/2018 – 12/2025

Project: Ayurvedic Pharmaceutical Business Operations - managed and scaled end-to-end operations across procurement, production, inventory, distribution, marketplaces, finance, and customer fulfillment.
- Led procurement, production, inventory, logistics, finance, marketplaces, and customer fulfillment across 15+ SKUs, using sales, inventory, and seasonal demand data to guide planning and operations.
- Expanded distribution to 150+ retail outlets and scaled revenue approximately 4× through distributor development, operational improvements, and data-informed decision-making.

Technologies used: Excel | Data Analysis | Inventory Analysis | Procurement Analytics | KPI Reporting | Supply Chain Management | Business Operations

06/2017 – 08/2018

Senior System Engineer
IBM, Bangalore, India
Project: Developed SAP BODS and SQL-based ETL workflows for SAP ECC data migration, including data transformation, validation, testing, and troubleshooting to ensure reliable data delivery.
Technologies used: SAP BODS | SAP ECC | SQL | ETL | Data Migration | Data Validation | Migration Testing | SDLC

06/2016 – 06/2017

Senior System Engineer
Timken, Bangalore, India
Project: Enterprise SAP Data Migration - Developed SAP BODS and SQL-based ETL processes for enterprise SAP data migration.

08/2014 – 06/2016

Software Engineering Analyst
Accenture, Bangalore, India
Project: SQL-based data migration solutions for enterprise clients.

EDUCATION

05/2010 – 05/2014

Bachelor of Technology / Electronics & Communication Engineering
Vellore Institute of Technology (VIT), Vellore, India

ACHIEVEMENTS / CERTIFICATIONS

e.g. Technical Professional (AWS) | Speaker & Panel Moderator (IT Convention 2018) | XXX | XXX

LANGUAGE SKILLS

English (C2) | Hindi (Mother tongue) | German (A1, currently learning)
